The car trucks have been spipped to Middletown and it is expected that the first trip on the line will be made on Saturday, April 10.

It is almost an assured fact that nother industrial plat will be built on the South Side in the near future. The Honesdale Iron Works, employing a large force of men, will probably be transferred from its present site in Honesdale and built on the ground that William Connell offered to the prospectors of the Scranton Lace factory. The plot is situated on the evel, overlooking the lower steel mill of the Lackawana Iron and Steel company, and contiguous to the ground on which the Scranton Axle works stand.

The Mincoka line of the Scranton Traction company passes within a block of the place, and railroad facilities are likewise convenient. The matter is not entirely settled yet, but the arrangements have proceeded so far us to guarantee an assurance that the industry will come to this side. The owner of the works, James Wood, is favorably impressed with the loca-
